Hello Kimberly – thanks for your follow-up note. Let me say thanks once again to you, Ed and Thuy for your time and helpful dialogue on Wednesday. Our members greatly appreciated it!

I have copied Mike Jones on this email. Also, his mobile # is 315-345-2373. Mike is a packaging engineer who runs his own packaging consultancy business ([Pak-Logic](#)). He is the member rep for one of our members and several of our other members are his clients.

I'm not sure yet whether we will request another session, but I am surveying our regular members (registrants) to see if there is a need for a second session.

FYI – I have sent my personal notes from the call to our Executive Board and requested their input so that we can have a consolidated set of notes. I may share these with you if you would be willing to comment on their accuracy. I will first review the press release that was just sent to check it against our notes.

Thanks again –

Mark

**Subject:** RE: Tentative Hold - call with the Ag Container Recycling Council on PFAS in containers

Hi Mark,

Quick follow-up to see if you'd like to schedule another session. Also, Michael Jones on the call had some good questions about container testing, and whether we'd considered different fluorination levels and in-mold vs-post-mold containers. Could I get Michael's contact information so that we can reach out?

Thank you, and I hope our call was helpful to you and your members.

Best,  
Kimberly
